

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

ERRATUM.

Nº 461. p. 473. l. 4. from the Bottom, for *Minutes* read *Seconds*.

An Addition to the Reverend Dr. Miles's Account of Fern-Seed, ibid. p. 772. after l. 16.

Whereas I have mention'd, that a sort of *Fungus*, of a light-brown Colour, grows over the Seed-vessels of the *Filix mas*; this is to be understood to have that Appearance, when the Seeds are full-ripe, and the Vessels containing them are prepared to burst: For I have since view'd them, soon after they begin to appear, and also when the Seed-vessels are nearly grown to their full Size; at which times the said *Fungus* is a fine Membrane of a bright Green, intirely covering the Tuft of Seed-vessels like a Cap, and closely adhering to the Surface of the Leaf of the Plant: But when the Seed-vessels are arriv'd at Perfection in Size, and able to bear being expos'd, it begins to recede from the Leaf, and to hang over them in form of an *Umbrella*; and as they grow ripe, it gradually changes brown, and curls up a little, making the Appearance first-mention'd.

Tooting, January 24. 1744-5.

Henry Miles.

ERRATUM.

Nº 472. p. 47. l. 5. read *one with another* in one Case only, where they are suppos'd to be bent to the same Degree, and that *without shewing*.
